- **Middle school Debate Course Description (4:30-5:30pm)**

Bradley Harris BA JD MFA has served as an educator for industry, government, the military, and higher education since 1974. Since 2013, he has ably served the students of Greater Memphis Chinese School with classroom teaching and individual instruction in subjects as diverse as SAT preparation, creative writing, public speaking, and debate.

His SAT prep experience includes ten years teaching three-day seminars in test preparation for such tests as the LSAT, GMAT, GRE, and SAT for Spectrum Seminars in several Canadian cities. As to debate, Brad was one of the founding board members of the Memphis Urban Debate League, serving as its secretary for ten years and judging many student debates.

Brad is an adjunct instructor at Rhodes College, teaching public speaking. He has also taught at The University of Memphis, LeMoyne Own College, MidSouth Community College, and The University of Calgary. An avid member of Toastmasters International, Brad is the only member in the Arkansas-Tennessee-Mississippi District 43 to have earned the Distinguished Toastmaster award five times. He has twice served as District Governor and once as a Region Advisor.

Brad is the author of two prizewinning short novels: Ruby Ruby (1999) and Thorazine Beach (2013), both from Vancouver's Anvil Press and both detective fiction set in Memphis. His full-length play Incoming has been performed in Memphis and Los Angeles.

Bradley Harris believes strongly that young people can perform—even like to perform—to high standards. He's an old army officer, and that means he likes discipline. He's also a creative writer, and that means he insists on having fun while he works, and helping others have fun, too, as an important aid to learning serious skills.

Debate skills are important later in school, at university, and in a host of occupations. In few occupations do people actually conduct formal debates. But every one of the debate skills, from speech rate to diction, articulation to cross-examination, rhetoric to question technique, stands as a practical professional skill anyone can use. In this course, we'll borrow learning content from two instructional realms—PUBLIC SPEAKING and POLICY DEBATE—to expose learners to a solid basic range of debate-related skills. The focus will be on developing the individual's skills. Learners should expect to work hard...have fun...and perform aloud in every class. There's no skating through this one!

Class limited to twelve dedicated learners.
