各位老师家长们:

8月10日下午, 罗博深教授将与大家探讨人工智能时代, 家庭教育, Math Tour, etc. 欢迎大家报名

<https://www.eventbrite.com/e/how-to-survive-the-chatgpt-invasion-memphis-tn-aug-10-2023-tickets-642454708327>

Event Description

The scale of global societal problems looks daunting. One person, or even a small team, is minuscule relative to the number of people who need help. For example, since ChatGPT has exploded onto the scene, our children's future employment prospects (and current educational experience, with ChatGPT-powered cheating) are in existential danger. There is an area close to mathematics, however, which devises solutions in which problems solve themselves even through self-serving human behavior: Game Theory. The speaker is a pure math professor, researcher, and educator who transitioned to using Game Theory to develop new solutions for large-scale real-world problems. He will talk about his experience going from the ivory tower of academia into the practical mess of the real world. He will also discuss educational strategies that build relevant skills to survive this new era of Generative AI (e.g. ChatGPT). He has been working extensively on this problem and draws from experience teaching across the entire spectrum, from underprivileged schools to the International Math Olympiad. This event will be completely different from an ordinary math talk. It will be fun and thought-provoking.

Speaker Info

Po-Shen Loh is a social entrepreneur and inventor working across mathematics, education, and healthcare. He is a math professor at Carnegie Mellon University and the national coach of the USA International Mathematical Olympiad team. He has pioneered innovations ranging from a scalable way for people to learn challenging math live online from brilliant people to a new way to control pandemics by leveraging self-interest. He has earned distinctions ranging from an International Mathematical Olympiad silver medal to the USA Presidential Early Career Award for Scientists and Engineers. He was the coach of Carnegie Mellon University's math team when it achieved its first-ever #1 rank among all North American universities, and the coach of the USA Math Olympiad team when it achieved its first-ever

back-to-back #1-rank victories in 2015 and 2016, and then again in 2018 and 2019. He featured in or co-created videos totaling over 19 million YouTube views.
